- · Contributed to collaborative software development through GitHub, including code reviews, pull requests, and version control.
- Collaborated with UI/UX and Backend teams to ensure smooth integration of design, functionality, and user experience.

PROJECTS

Emonesia May 2025 - Aug 2025

A social media emotion detection application built using the IndoBERT model. Designed to analyze emotions in texts from social media X (Twitter) based on user-defined keywords and time ranges. The system provides detailed emotion classification results and generates downloadable PDF reports, offering valuable insights for research and sentiment analysis. Achieved 97% accuracy in emotion classification during testing. Provides structured PDF reports that improve readability and usability for opinion analysis. Helps the public monitor social and cultural trends or current issues widely discussed on social media, and serves as a decision-support tool for individuals, groups, and organizations.

Dzikra Nov 2024 - Dec 2024

Dzikra is an application specifically designed to help you build good habits in the midst of high mobility to remain consistent in fulfilling your daily worship needs

Raisehand Sep 2024 - Dec 2024

An internal employee attendance app developed by Inovasi360 and Bigio. Designed to simplify the digital attendance process, Raisehand offers features such as location-based check-in/out, automatic notifications, and efficient attendance data recap. This solution helps companies improve accuracy and efficiency in employee attendance management.
